IEEE Complaint Margin Requirements for Paper Submission in EDAS

For US Letter-sized papers (in inches)

- Maximum text width: 7.26 in
- Gutter between columns: 0.12 in
- Minimum left/right margins: 0.62 in
- Minimum top margin (first page): 0.75 in
- Minimum top margin (other pages): 0.75 in
- Minimum bottom margin: 1.0 in

For A4-sized papers (in centimeters)

- EDAS notes that PDF converters sometimes shift content, so they advise keeping margins slightly larger than the template (e.g., add 0.1 cm).
- Minimum left/right margins: 1.57 cm
- Minimum top margin (first page): 0.96 cm
- Minimum top margin (other pages): 1.9 cm
- Minimum bottom margin: 4.3 cm

Practical Guidance for Authors

- Ensure your paper stays within these minimum margins—EDAS can reject PDFs that violate them.
- Small variations during PDF creation are normal; keeping margins *slightly above* the minimum helps avoid rejection.
- Check margins on your final PDF (not just the source file).
